PROFESSIONAL SUMMARY

Full Stack Engineer with 2.5 years of experience building scalable, production-grade web applications using React, TypeScript, Java, Spring Boot, and MySQL. Experienced in designing secure REST APIs, authentication systems (Spring Security, JWT/OAuth, AWS Cognito), cloud deployments, CI/CD automation, and performance optimization. Proven ability to own complete features end-to-end — from system architecture and API design to Dockerized deployment and production support. Strong engineering mindset with a focus on scalability, modularity, and code quality in Agile environments.

CORE COMPETENCIES

- | | | |
|------------------------------|------------------------------|---------------------------|
| ▸ Full Stack Development | ▸ REST API Design & Security | ▸ Authentication & AuthZ |
| ▸ Cloud Deployment (AWS) | ▸ CI/CD Automation | ▸ Performance Engineering |
| ▸ Database Design & Indexing | ▸ Scalable Architecture | ▸ Agile / SDLC Ownership |

TECHNICAL SKILLS

Languages: Java (Core & Advanced), TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend: React.js, React Router, Redux Toolkit, React Hook Form, Zod, Tailwind CSS, Shadcn UI, Vite, Code Splitting, Lazy Loading, Responsive Design

Backend: Java, Spring Boot, Node.js, Express.js, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT Authentication, OAuth2, Role-Based Access Control (RBAC), API Rate Limiting, Event-Driven Architecture, Microservices

Database: MySQL, PostgreSQL, Database Design, Query Optimization, Database Indexing

Cloud & DevOps: AWS, GCP (Authentication, Virtual Machines, Object Storage, Container Services, Managed Database, Messaging/Pub-Sub), Docker, Nginx, GitHub Actions, CI/CD, Linux, Maven, Gradle

Engineering: OOP (Object-Oriented Programming), SOLID Principles, Design Patterns, Data Structures & Algorithms, Modular Architecture, Multi-threading, Async Processing

APIs & AI: Google Gemini API, Model Context Protocol (MCP), Third-Party API Integration

Tools & Practices: Git, GitHub, VS Code, Postman, JUnit, Mockito, Jira, Agile, Code Reviews, Debugging, Production Support

WORK EXPERIENCE

Java Full Stack Developer — Voltuswave Technologies India Pvt. Ltd. Feb 2024 – Jul 2026 | Hyderabad, India

- Developed and maintained scalable full-stack applications using **React (TypeScript)**, **Java**, **Spring Boot**, and **MySQL**, supporting multi-tenant business workflows across the complete SDLC — from architecture and API design to deployment and production support.
- Designed secure RESTful APIs with **Spring Security**, JWT/OAuth-based authentication, RBAC authorization, input validation, and tenant-level access control, ensuring enterprise-grade API security and data isolation.
- Reduced deployment errors and release cycle time by automating CI/CD pipelines using **GitHub Actions** with Maven and Dockerized workflows, eliminating manual release steps and ensuring environment parity.
- Improved frontend performance by **~40%** through lazy loading, code splitting, caching strategies, and optimized API request handling — significantly reducing page load times and improving user experience.
- Containerized Spring Boot services with **Docker** and deployed to **AWS/GCP**, achieving high availability and reliable production deployments.
- Collaborated in Agile sprints with cross-functional teams, participated in code reviews, debugged production incidents, and consistently delivered production-ready features aligned with business requirements.

PROJECTS

Voltusfreight — Multi-Tenant Freight Forwarding Platform

React, TypeScript, Java, Spring Boot, Spring Security, Hibernate, MySQL, AWS Cognito, Docker, GitHub Actions

- Architected end-to-end authentication and authorization (signup, login, RBAC) using **AWS Cognito** and **Spring Security**, enabling secure token management, session control, and strict tenant-isolated data access across multi-tenant workflows.
- Implemented real-time user activity tracking and analytics dashboards capturing post-login actions, session duration, and behavioral patterns — providing administrators with operational visibility and business insights.
- Designed and developed a responsive, component-driven UI with **React**, **TypeScript**, **Tailwind CSS**, and **Shadcn UI**, accelerating delivery of tenant-facing modules and ensuring consistent design system adoption.
- Built RESTful APIs with **Java** and **Spring Boot** for shipment, quote, and document workflows; modeled **MySQL** schemas using **Spring Data JPA (Hibernate)** with tenant-scoped queries and database indexing to enforce data isolation and optimize query performance.
- Containerized **Spring Boot** microservices with **Docker** and deployed to **AWS**, automating builds, tests, and zero-downtime releases via **GitHub Actions** CI/CD pipelines.

VoltusCRM — Freight Forwarding CRM Platform

React, TypeScript, Java, Spring Boot, Spring Security, Hibernate, MySQL, AWS, Docker, GitHub Actions

- Architected customer relationship & lead management module by building RESTful APIs with **Java** and **Spring Boot** to manage shipper accounts, sales pipelines, and interaction histories.
- Engineered an opportunity management & deal pipeline module using **Java**, **Spring Boot**, and **Spring Data JPA** to track lead stages, sales milestones, and automated deal progression.
- Developed interactive UI analytics dashboards using **React**, **TypeScript**, and **Redux Toolkit**, providing sales teams with real-time pipeline visibility, lead conversion metrics, and revenue forecasts.
- Implemented secure role-based access control (RBAC) and JWT authentication with **Spring Security**, ensuring strict tenant data isolation and access control across sales teams and enterprise clients.
- Containerized microservices using **Docker** and established **GitHub Actions** CI/CD pipelines for automated testing, build verification, and zero-downtime deployments on **AWS**.

EDUCATION

Full Stack Development — Nxtwave Disruptive Technologies	Hyderabad Jan 2024
B.E. Civil Engineering — Chaitanya Bharathi Institute of Technology (CBIT)	Hyderabad May 2023
